

Dear Roger,

7/3/93

It is possible that Dr. Robert Artwohl may ask for a copy of your Lifton ms.

I told him about it. He dislikes Lifton and his work and when I showed him the PW/article on the coming books, Livingstone's in particular, he said that Livingstone is responsible for more misinformation than anyone else.

Livingstone wrote a letter to Artwohl's hospital<sup>a</sup> complaining about Artwohl-on Baltimore police stationery!

He spent most of yesterday here.

As you know from his JAMA article he supports the conclusions of the Commission.

He does this although he disputes just about all the Commission's reasons for reaching those conclusions.

He disputes it on when the shots were fired but says its explanation of each shot is correct<sup>1</sup>.

He has gone to what I think are extraordinary lengths to be able to say what he does.

He said he'll be back soon, with his wife.

He is a pleasant, agreeable man.

Thoughtful and wanting to be helpful.

After lunch we talked in the car while Lil got a prescription for me. When I got home it was an incorrect one. I called that pharmacy and complained and they looked and said they had the correct one packaged but when the clerk had not looked. Bob said he would get it for me and return the incorrect one. We compromised by him keeping me company.

And that was at the time he should have left for home.

So, he was late getting home.

Best,

Harold
